

AFRYAN FANINDYA PRAYOGI

Malang, East Java, Indonesia | afryanwork@gmail.com | www.linkedin.com/in/afryanprayy

SUMMARY

Information Technology graduate from Telkom University with a strong interest in cybersecurity, network security, and IoT. Familiar with security tools and concepts such as SIEM monitoring with Wazuh, Linux based security testing using Kali Linux, and fundamental SOC analysis. Currently enrolled in CompTIA Security+ training at ID-Networkers, supported by a solid understanding of computer networking through the MTCNA certification, as well as practical knowledge in IoT, embedded systems, and data management. Highly motivated to grow in the cybersecurity field, with strong adaptability, critical thinking, and a continuous learning mindset to contribute to secure and reliable digital systems.

SKILLS

Cybersecurity	Hard Skill	Soft Skill
- Cybersecurity Fundamentals - SIEM Analysis (Wazuh) - Vulnerability Assessment - Penetration Testing	- Internet of Things - Network Fundamentals - Data Management - Programming - Embedded System	- Critical Thinking - Adaptability - Time Management - Reliability

EXPERIENCE

Telkom DWS - Data Management Intern

June 2025 - Aug 2025

Learned and explored data management practices within Telkom’s Wholesale Service division. Gained hands on experience in ETL processes and utilized Pentaho Data Integration to transform raw data into structured datasets. Also studied the underlying concepts of data flow, storage, and transformation to support effective data driven decision making.

Hardware and Embedded System Laboratory

May 2025 - April 2026

● Head of Curriculum

Responsible for designing and updating the curriculum and learning modules for the study group. Ensure the learning by regularly reviewed and revised the curriculum to enhance its relevance, clarity, and effectiveness.

● Head of IoT Division

June 2024 - May 2025

Responsible for organizing, teaching, and developing learning materials for the study group. Guided members in understanding IoT concepts, working with ESP32, integrating sensors, and implementing communication protocols such as MQTT.

● Study Group Member

Nov 2023 - June 2024

Explored embedded systems and IoT technologies. Gained hands on experience working with Arduino and various sensors, learning how to integrate hardware components efficiently. Studied IoT concepts using ESP32, implementing communication protocols such as MQTT to connect devices to the internet.

As a member of the Machine Learning division at GDGoC Telkom University, actively learning and exploring various concepts in machine learning, including data preprocessing, model development, and deployment. Collaborated with peers on hands on projects, gaining practical experience in building AI driven solutions.

EDUCATION

Telkom University | Information Technology | GPA: 3.75

Sept 2022 - April 2026

As an Information Technology graduate from Telkom University, I developed a strong interest in cybersecurity, especially in vulnerability assessment, security monitoring, and penetration testing. I am familiar with programming languages such as Golang, C++, Python, and HTML. I was also actively involved in the Laboratory of Hardware and Embedded Systems (HES), from study group member to Head of Curriculum, and joined the Machine Learning division at GDGoC Telkom University.

CERTIFICATIONS

- MikroTik Certified Network Associate (MTCNA), MikroTik
- Cybersecurity - L1 SOC Analyst, Jadi Hacker
- Internet of Things (Mastered), SanberCode
- Mastering Smart Contract (Blockchain), Indonesia On-Chain
- Foundations of Cybersecurity, Coursera
